

## MultiFinder Pro

Universal detector for locating wood, metal, copper, iron and live wires

This universal detector reliably locates metal, iron, copper, wood and live wires. The MultiFinder Pro adapts directly to different surfaces, offers reliable drilling, and is suitable for cavity location. It is even able to detect wires underneath plaster when they are not live. Acoustic and optical signals clearly show when items have been located. A permanent voltage warning protects the user. The device is convenient to use due to easy, one-button switching between different measuring modes and the operating instructions on the LC display.
