

## GasCheck

### Measuring device for determining gas level in LPG cylinders - recycled material is used for sustainability

The GasCheck allows the fill level of steel LPG cylinders (5 kg/11 kg) to be quickly determined. The device is simply pressed against the outside of the cylinder to be checked. Coloured visual and acoustic signals indicate the level. Users thus have a good indication of whether there is enough gas in the cylinder for their requirements or whether a second cylinder is required. Typical application areas are camping, BBQs, radiant heaters or working with gas burners. The housing is largely made of recycled material, making a valuable contribution to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- For determining the level in steel LPG cylinders
- Ideal for camping, BBQs, radiant heaters or working with gas burners
- Visual signal for indicating level
- Auto shut-off function

#### TECHNICAL DATA

<b>Features</b>	Level identification
<b>Aluminium/Steel Cylinder Diameter</b>	200 mm ... 350 mm
<b>Automatic Switch-Off</b>	yes
<b>Features</b>	Liquid gas cylinders (LPG) steel (5 kg / 11 kg)
<b>Power Supply</b>	1 x 9V 6LR61 (9V block)
<b>Operating Time</b>	100.000 measurements / battery charge
<b>Dimensions (W x H x D)</b>	30 mm x 46 mm x 146 mm
<b>Weight</b>	99 g (incl. battery)

#### SCOPE OF DELIVERY
