

ClimaHome-Check Plus

Digital hygrometer with ventilation recommendation to improve indoor climate - recycled material used for sustainability

This digital hygrometer provides precise information on the ambient temperature and relative humidity. This practical device saves the minimum and maximum climate values. The user is warned of high air humidity and dryness. If the optimum humidity for people of 40 to 60 % is not maintained or the air is too dry, the indoor climate can be improved through the recommended ventilation. A well-balanced room climate has a positive influence on health, increases comfort levels, and helps avoid damage caused by moisture. The permanent time display and timer function are extremely useful, particularly when used in the kitchen. The housing is largely made of recycled material, making a valuable contribution to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- Precise measurement of relative humidity and ambient temperature and saves min./max. readings Measurements
- Visual and acoustic warning of high humidity and air dryness
- Ventilation recommendation to improve indoor climate
- Positive influence on health and comfort levels

TECHNICAL DATA

Measured Variable	Ambient temperature Humidity
Measuring Range Ambient Temperature	-9,9°C ... 50°C
Accuracy Ambient Temperature	± 1°C
Measuring Range Humidity (Relative)	1% ... 99%
Accuracy (Absolute) Humidity (Relative)	20% ... 80% (± 3%) <20% and >80% (± 5%)

SCOPE OF DELIVERY

Item No. 082.426E GTIN (EAN) 4021563735693 SU 5
