

ClimaHome-Check

Digital hygrometer for information on the indoor climate - recycled material used for sustainability

This digital hygrometer provides information on the ambient temperature and relative humidity. This practical device saves the minimum and maximum climate values. It is therefore possible to easily check whether the optimum humidity for people of 40 to 60 % has been achieved. The device can also be used in infrequently visited locations where an inappropriate indoor climate is difficult to detect without a hygrometer, such as in a cellar. The fold-out stand/clip with integral magnets allows the device to be placed on tables, attached to objects, or fixed to metal surfaces. The housing is largely made of recycled material, making a valuable contribution to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- Precise measurement of relative humidity and ambient temperature and saves min./max. readings Measurements
- Easy to check whether the optimum humidity for people (40-60%) has been achieved.
- Can be placed on tables, attached to objects, or fixed to metal surfaces
- Easy-to-read LC display

TECHNICAL DATA

Measured Variable	Humidity Ambient temperature
Measuring Range Ambient Temperature	-9.9°C ... 60°C
Accuracy Ambient Temperature	± 1°C (0°C ... 50°C) ± 2°C (<0°C and >50°C)
Measuring Range Humidity (Relative)	20% ... 95%
Accuracy (Absolute) Humidity (Relative)	± 3% (30% ... 70%) ± 5% (20% ... 30%, 70% ... 95%)
